

Groot Steel

In Eeshoke Village, Oshikango of Ohangwena Region, Namibia, Groot Steel is being setup to manufacture rebars, billets, wire rods and reinforcement steel for use in the construction industry.

Set to a tall Budget of US\$450 million (N\$5.7 billion), this mega Project comes on stream to create about 5,500 direct jobs and over 27,000 indirect employment opportunities in our decisive efforts to drastically reduce poverty through gainful employment in the country as part of Groot Steel's Corporate Social Responsibility.

Scaled to deliver on service excellence and global best practices, Groot Steel seeks to become the world's largest vertically integrated manufacturing hub for a wide range of flat, short and long steel products as well as value-added steel sheet and tubular products for the automotive, appliance, container, industrial machinery, construction, and oil and gas industries around the world.

Anchored on the most advanced technology of our time, Groot Steel is installing an Electric Arc Furnace (EAF) Quantum for the first Melt Shop and Rolling Mill to produce 1,000,000 tons of billets and rebars per year and 2,000,000 tons of Wire Rods yearly.

EAF Quantum delivers minimum conversion costs, maximized output, and environmental compliance. Feeding the Melt Shop with 100% scrap metals, the EAF Quantum offers the most convenience and friendly steelmaking.

The high demand for steel and steel products both in Manufacturing, Construction and Domestic use underscores the ready market, open for Groot Steel products. Moreover, the low number of key players in Steelmaking in this part of globe gives Groot Steel an added advantage and commiserate reward in the foresighted engagement in this profitable venture with strong focus on production of quality steel; long, short and flat bars for the local and SADC markets.

Project construction is scheduled to start by September 2018 and commissioning timeline is the year 2020.

Steel Production

At a glance..

Project: Groot Steel Minimill, Melt Shop and Rolling Mill
Client: Groot Steel (Pty) Ltd
Capacity: (Tonnes) Billets: 1,000,000 and Rebars + Wire Rods: 2,000,000 per year
EDC: European Engineering Firm
Contractors: Groot Construction
Construction Jobs: 1,500
Direct Jobs: 5,500
Indirect Jobs: Over 27,000
